The corporate governance of Credit Saison Co., Ltd. (the “Company”) is described below.

I. Basic Views on Corporate Governance, Capital Structure, Corporate Profile and Other Basic Information

1. Basic Views

■ Management Philosophy

We will fulfill our corporate social responsibility by striving to meet the expectations of all of our customers, shareholders, and business partners. We will compete successfully in the market by promoting our three shared values:

practical implementation of the principles of customer satisfaction as a leading-edge service company;
mutual respect for our interests and those of our business partners; and,
developing a corporate culture of creative innovation.

■ Corporate Governance

To realize our basic management policy of obtaining the understanding and approval of our stakeholders such as our customers, business partners, employees, shareholders and society by continuously improving corporate value over time and creating innovative services, the Company is implementing a variety of initiatives to improve and strengthen our corporate governance in recognition of the enormous importance of enhancing management transparency and bolstering management supervisory functions to attain business objectives.

The Company has adopted the Audit & Supervisory Board (the “ASB”) model, with the ASB members. The Company has established the Board of Directors, the ASB, and the accounting auditor as the corporate’s organization. To ensure the Company retains the confidence of our shareholders and other investors, the Company strives to improve and strengthen corporate governance by nominating outside Directors and the outside ASB members. The Board of Directors and Nomination & Remuneration Committee receive advice and recommendations from outside Directors to ensure the appropriateness of business decision-making. This enables Directors, who are well versed in business matters, to maintain and improve management efficiency. In addition, the ASB is strengthening its management oversight function by coordinating with Directors, executive officers and others from the Internal Audit Office and the unit responsible for supervision of internal controls, and the Audit Department ensures its independence by having a direct reporting line to the Board of Directors,

separate from reports to the Representative Director.

In March 2020, the Company reviewed the composition of the Board of Directors and introduced an executive officer system in order to further strengthen our corporate governance system through the separation of business execution and management oversight. Thus, the Company achieved more appropriate management and supervisory functions and establish an efficient business execution system.

The Board of Directors consists of 12 Directors, including 4 independent outside Directors. Along with deciding operational execution with regards to important matters concerning management, the Board oversees the performance of duties by Directors. In order to build a flexible management system that responds to changes in the business environment and earns the confidence of shareholders in the Company's management, the term of office for Directors is set at 1 year.

The ASB consists of 3 ASB members, including 2 independent outside ASB members. It determines audit policy and matters concerning the execution of other duties by the ASB members as well as compiling audit reports. Furthermore, in order to realize sustainable growth in corporate value, the Company has positioned the enhancement of corporate governance as an important management initiative, and the Company is working to achieve this by establishing an internal control system, strengthening our risk management system, ensuring thorough compliance, and creating mechanisms through diversity, equity and inclusion.

In constructing the internal control system, the Corporate Planning Department, which is the division responsible for internal control, serves as a hub for constructing the internal control system and the Board of Directors determines the basic policy for the internal control system in order to establish a system to ensure the appropriateness and efficiency of operations. With regard to the internal control system for financial reporting, mainly the Risk Management Department is responsible for promoting the development of internal controls for the Company and its consolidated subsidiaries, and the Audit Department conducts independent monitoring of such internal controls.

With regard to risk management, the Company strives to prevent eliciting risks and to minimize their impact on the Company with Risk Management Committee and the Risk Control Department, which serve as a hub for such striving, and the Audit Department is working to strengthen the system by periodically verifying the monitoring status of each department by the Risk Control Department from an independent standpoint. To be prepared for such occasions, the Company is making efforts to maintain its risk-management system by regularly training its employees, based on the principles of the "Risk Management Regulations," "Regulations Regarding Management of Risk of Loss" and the "Crisis Management Regulations," and the Risk Control Department and the Audit Department hold monthly information coordination meetings to strengthen the cooperation in the second and third lines of defense. In addition to the above, with regard to matters inherent in our Company Group or control matters that involve serious risks, for domestic subsidiaries, the Group Strategic Management Department establishes and controls the matters, and for the overseas subsidiaries, the Global Management Department which is responsible for overall management of overseas affiliate subsidiaries gathers information and coordinates with and reports to the relevant departments within the Company, including the Group Strategic

Management Department. By the above, the Company oversees the status of business execution at each Group company and shares information with the departments in charge of each Group company.

The Company has established the Compliance Committee to ensure a legal compliance, fairness and ethical behavior in its corporate activities. In addition to appointing a compliance officer in each department, the Company has established the “Action Declaration” to determine how the company itself should act, and have compiled the “Behavioral Standards” to explain how executives and employees should act. The Company is working to strengthen our compliance system by disclosure on internal website to ensure thorough implementation of this Declaration, disseminating information regarding counseling desk, and conducting compliance training, etc.

With regard to the audit system, in order to meet the demands of the times and the expectations of society, the Company is performing audit functions with the mission “to strengthen global governance of group based on our culture and business, and to fulfill our professional roles and functions so that we can be trusted by shareholders, management, and departments and add value to the organization”. In addition, in order to achieve our mission, we believe it is necessary to “improve audit maturity on a group and global basis” and are working to strengthen our human resources and improve audit quality., etc.

The structure for diversity, equity and inclusiveness is available on our website.

[Principle 4-11: Assumptions for ensuring the effectiveness of the Board of Directors and Audit & Supervisory Board]

The Company will hereafter strive to appoint a diverse range of Directors, including those from the perspectives of gender and internationality, based on our mid-term or long-term management strategy. The Company has appointed independent outside Directors who possess the knowledge necessary to effectively contribute to the Company's sustainable growth and the improvement of corporate value over the mid-term or long-term, including knowledge of financial matters such as capital efficiency. The ASB members of the Company are also appointed as the ones who are equipped with appropriate experience and abilities as well as the necessary knowledge of finance, accounting and legal affairs.

In August 2021, the Company established the Sustainability Promotion Committee, with the participation of the Representative, Executive President and COO, to discuss the direction of activities related to sustainability strategies and report to the Representative Director. In addition to addressing the issue of climate change, the Committee, which consists of members from diverse backgrounds, including internal and external members, members with gender equality, and members with global perspectives and the secretariat of which is served by the Sustainability Promotion Department newly established in March 2024, is working to realize a sustainable society by promoting diversity, equity and inclusion, including the active participation of women and impact strategies in global business.

In FY2024, the Committee was convened 4 times, and the Committee deepened discussions on sustainability strategies and initiatives throughout the Group, reported to the Representative Director and, if necessary, to the Board of Directors.

The Company is collecting and analyzing necessary data on the impact of climate change-related risks and profit opportunities on its business activities and profits. <Investment in human capital, intellectual property, etc.>

The Company recognizes that investments in human capital and intellectual property are important management resources, and we have described our approach to human capital and human resource development policies in <I-1> [Disclosure Based on the Principles of the Corporate Governance Code] [Supplementary Principle 2-4-1 Ensuring Diversity in Promotion of Core Human Resources.].

With regard to investments in intellectual property, the Company will conduct growth investments for the future and investments that contribute to the realization of sustainable growth of existing businesses, and verify the effects of these investments.

In September 2021, in order to further promote business changing and transformation through the use of digital technologies, the Company launched a digital transformation strategy (hereinafter referred to as the "CSDX Strategy"). Aiming to become a digital advanced company that provides experiences that exceed customer expectations, the Company is accelerating its corporate transformation by building a company-wide DX promotion system, and promoting the development of digital human resources and in-house production. In November 2022, the Company announced the quantitative and qualitative targets of "Creation of 1,000 digital human resources," "Achievement of 80% cloud utilization rate," "Complete digitization of business process" and "Building of Saison Data Platform" as "CSDX TARGET 2024", in order to realize the "CSDX VISION". In the area of the development of digital human resources, the number of digital human resources was 483 as of the end of March 2025, falling short of the numerical target. However, through the recruitment of engineers, data scientists, and other personnel to lead CSDX promotion, and training that emphasizes practical skills in digital technology, the efficiency of business operations through the use of in-house systems and software was promoted. As a result, the Company has realized a cumulative reduction of approximately 1.61 million hours from FY 2019 to FY 2024. As for future developments, the Company will promote CSAX (Credit Saison AI Transformation) to further accelerate CSDX. Specific initiatives include the formation of a dedicated AI team to promote the use of AI in identifying priority areas, such as support for call centers and sales staff, and streamlining system development, etc. Using this as an engine for growth, the Company will accelerate CSDX with the aim of establishing a new structure that enables all employees to engage in AI-based business reforms based on the results and challenges gained from bringing system development in-house.

In addition, CSDX Strategy is available on our website.

[Supplementary Principle 2-4-1 Ensuring Diversity in Promotion of Core Human Resources]

<Concept and status of ensuring diversity>

Since the 1980s, the Company has been actively recruiting women to promote their participation in society.

To realize that women play an active role in a wide range of occupations and positions, the Company has expanded the system by listening to the voices of our employees for the purpose that they do not give up

continuing employment or forming a career through life events such as marriage and childbirth.

Throughout the years, the Company, by expanding the system and establishing actual achievement, create a corporate culture in which diverse human resources with different backgrounds, such as gender, academic background, and nationality, are able to utilize their individuality and play an active role.

In addition, regarding the appointment of female managers, the Company considers it one of our key strategies to encourage women, who account for approximately 70% of our employees, to take on more outspoken roles and contribute to the Company. We have been working to increase the percentage of female employees in division manager or higher positions to 25% or more by March 2024. We achieved this goal in both FY2023 and FY2024, and we will continue to promote maintaining 25% or more in FY2025. As our efforts to maintain this percentage, we have introduced and are utilizing various career support measures, such as seminars to support the balance between childcare and work, the introduction of the “Kosodate Mirai

Concierge,” a company-led nursery school matching service to enable women to return to work when they wish. In addition to introducing a childcare leave system that exceeds the legally mandated standard, the Company is working to achieve a workplace culture in which everyone, regardless of gender, can actively participate in childcare. We have been working to achieve a 100% male childcare leave utilization rate by March 2025. By the end of March 2024, the percentage was 65.5%, but by the end of March 2025, the percentage had increased to 86.2%. Although we fell short of our target, we have continued to build awareness among employees by holding company-wide events where they can learn about DE&I and by having lectures given by employees who have taken male parental leave, etc. We will continue to accelerate our efforts to increase the take-up rate, aiming to achieve 100% male childcare leave utilization rate by the end of March 2026

On the other hand, foreign nationals and mid-career recruits are promoted to managerial positions according to their abilities and achievements, and there are no differences according to nationality or the time of employment. Therefore, the Company does not formulate or disclose targets at this time. However, as of the end of March 2025, including consolidated subsidiaries, 8.6% are foreign directors and 2.8 % are foreign company auditors. In addition, since as one of the essences of the growth strategy in the medium-term management plan, the Company sets up the policy for the scale-up of global businesses, and the human resources of various nationalities are playing an active role and leading the business at the overseas subsidiaries. For mid-career recruits, the Company will strengthen the human resources that will be responsible for business growth as strengthening the management base and promote mid-career hiring and reskilling as professionalization of human resources.

<Human resource development policy for ensuring diversity, in-house environmental improvement policy, and their status>

In order to provide new value to society as a "leading-edge service company," the Company believes it is necessary to continue to be a rewarding, vibrant organization that enables all employees to demonstrate their full potential and gain a sense of fulfillment. To this end, the Company is promoting a human resource strategy that realizes the visualization of human resources, the right person in the right place, and the support for growth so that the Company can maximize its performance by focusing on the individuality and strengths of each employee. Through our diverse personnel system, the Company aims to create an environment in which employees can continue to take on challenges with peace of mind. Disclosure of Policy on Determining Remuneration Amounts and Calculation Methods

The contents of Policy on Determining Individual Directors' Compensation are as follows.

■ Basic Policy

- (1) Basic Policy on the system of remuneration for Directors and Individual Directors' Compensation is to set the level of remuneration for Directors in accordance with their position and existence of representative rights, etc. while taking into consideration the level of remuneration in other companies and industries of similar size and the balance with employee salaries, etc.
- (2) The remuneration for inside Directors consists of basic remuneration, performance-based remuneration (bonus), and Restricted Stock Compensation. The remuneration for outside Directors consists of basic remuneration only.

■ Policy on Determining Individual Directors' Remuneration Amounts (including policies on determining the timing and conditions for granting remuneration)

1. Policy on basic remuneration (monetary remuneration)

- The basic remuneration is a fixed monthly remuneration, and the annual remuneration level by position is set and the amount is calculated after taking into account existence of representative rights, etc.
- Fringe benefits such as housing allowance, child allowance, and temporary return allowance, etc. may be paid to Directors posted overseas.

2. Policy on determining the content and the amount or the method of calculation for performance-based remuneration

- The performance-based remuneration (bonus) is calculated by multiplying the amount of the basic bonus by position, etc., taking into account the retention rate, etc., by the performance-based coefficient for quantitative indicators (based on a 50:50 weighting of the growth rate of quantitative performance indicators and the achievement rate of plans, respectively, and comprehensively taking into account the occurrence of large-scale disasters, pandemics, etc.) and the performance-based coefficient for qualitative evaluation, and will be paid at a certain time each year.
- The performance indicators for the performance-based remuneration (bonus) are the growth rate of non-consolidated ordinary income (excluding one-time factors, etc.) and the achievement rate of plans in order to enhance corporate value. In addition, the Company uses as qualitative performance indicators

the results of evaluation of each Director by all Directors, including such Director, regarding each director's contribution to the Company's performance and enhancement in corporate value.

3. Policy on non-monetary remuneration

- Non-monetary remuneration shall be paid at a certain time each year as Restricted Stock Compensation, with the annual remuneration level set by position and the amount calculated by taking into consideration such factors as existence of representative rights.
 - The following conditions have been set for the Restricted Stock Compensation.
- (1) Eligible Directors shall not transfer, create a security interest on, or otherwise dispose of (hereinafter referred to as "Transfer Restriction") the restricted stock that is allotted as such Compensation (hereinafter referred to as "Allotted Shares") during the period from the day when the Eligible Directors are allotted the Allotted Shares up to the day when such Eligible Directors retire or leave any of their position as Director or any other position specified by the Board of Directors (hereinafter referred to as "Transfer Restriction Period").

However, in the event that the Eligible Directors retire or leave any of the positions specified in (1) above prior to the expiration of the Period of Service, for the reasons stipulated in (2) above that are acknowledged as justifiable by the Company's Board of Directors, the number of Allotted Shares for which the Transfer Restriction is to be lifted and the timing of lifting the Transfer Restriction shall be reasonably adjusted as necessary.
 - (4) Pursuant to the stipulation in (3) above, at the time of expiration of the Transfer Restriction Period, the Company will acquire the Allotted Shares for which the Transfer Restriction has not been lifted, rightfully without contribution.
 - (5) Notwithstanding the stipulation in (1) above, in the case where an agreement of a merger with the Company as the disappearing company, share exchange agreement or share transfer plan through which the Company becomes a wholly-owned subsidiary, or a matter concerning other organizational restructuring, etc. is approved at the Company's General Meeting of Shareholders (or at the Company's Board of Directors meeting in the case where approval of the General Meeting of Shareholders is not required for the said organizational restructuring, etc.) during the Transfer Restriction Period, the Transfer Restriction will be lifted by the resolution of the Company's Board of Directors prior to the effective date of the said organizational restructuring, etc., with regard to the number of the Allotted
